

MANDIANT CONSULTING SERVICES

RESPONDING TO THE MOST CRITICAL BREACHES AND
EMPOWERING COMPANIES TO PROTECT THEIR KEY ASSETS.

MANDIANT CONSULTING OVERVIEW

Mandiant, a FireEye company, is a trusted advisor to organizations worldwide with over 10 years of near-daily interaction with organized, persistent attackers and threat groups around the world. We log thousands of hours annually working reactively and proactively with organizations of all sizes to remediate security breaches, identify vulnerabilities that targeted attackers exploit and provide guidance on closing security gaps to reduce the risk of a future cyber incident.

Evolving Threat Landscape

It's a "who,"
not a "what"

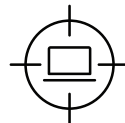

There's a human at a keyboard
Highly tailored and customized attacks
Targeted specifically at you

They are professional,
organized and well
funded

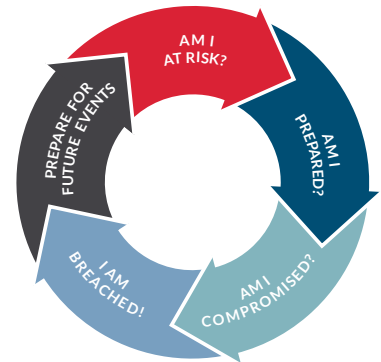

Escalate sophistication of tactics as needed
Relentlessly focused on their objective

If you kick them out
they will return

They have specific objectives
Their goal is long-term occupation
Persistence tools ensure ongoing access

INCIDENT RESPONSE AND PREPAREDNESS CYCLE

In a rapidly evolving threat landscape, Mandiant helps organizations protect their key assets by responding to the most critical cyber incidents and empowers organizations to improve their security posture.

“Mandiant is at the forefront of helping organizations rethink how to prepare for security breaches.”

—
Michael Chertoff

Former Secretary of Homeland Security

The Mandiant Difference

Mandiant combines a deep understanding of attacker behavior with intelligence based on exceptional visibility into the evolving threat landscape and an extensive technology platform to do so with speed, scale and efficiency.

Expertise: Over a decade of front-line experience responding to the most critical breaches. We see what the attackers did, how they did it, the tools and techniques they used and what they were after. This enables us to see the big picture, understanding evolving attacker behavior and motivations in a way others cannot.

Intelligence: Mandiant's intelligence-led approach to services incorporates industry-leading cyber threat intelligence from over 250 FireEye iSight intelligence experts, thousands of Mandiant investigations, FireEye products and our managed service — FireEye as a Service for worldwide visibility into the rapidly evolving threat landscape.

Technology: Mandiant leverages FireEye endpoint technology, network sensors and analytics platforms that can operate from the cloud or on-premise depending on client needs, whether running Windows, Linux or MacOS. Our technology enables a rapid response at greater scale, minimizing expense.

PREPAREDNESS CYCLE PHASE	SERVICE	OVERVIEW	KEY BENEFIT
AM I AT RISK?	Red Teaming and Penetration Testing	Test your security posture using the same tools, tactics and procedures (TTPs) as the advanced attackers we see every day during our Incident Response engagements.	Identify previously undetected weaknesses before an attacker does.
	Industrial Control Systems (ICS) Healthcheck	Minimally invasive assessment of an industrial facility's overall cyber security posture, bridging between IT and OT security.	Understand your ICS's exposed vulnerabilities and establish a plan to reduce your system's cyber security risk.
	Mergers & Acquisition (M&A) Risk Assessment	Analyze and measure an acquisition target's cyber security environment and risk level across critical domains as part of M&A due diligence.	Understand the risk profile and security posture of a merger or acquisition target.
AM I PREPARED?	Incident Response Retainer	When you have a security incident, Mandiant will help you scope, investigate and contain it.	Resolve critical security incidents and establish long-term solutions to address systemic causes.
	Security Program Assessment	An in-depth evaluation of the organization's information security programs across ten security domains, each of which is mapped to compliance, security and industry frameworks.	Evaluate the effectiveness of your information security program to improve your security posture and reduce risk.
	Response Readiness Assessment	An independent maturity assessment of your security monitoring and response capabilities, informed by our experience on the front lines of incident response.	Learn how to improve your defense posture to find and stop attackers faster.
	Cyber Insurance Risk Assessment	A high-level risk assessment of an organization's technology-based risks for cyber-insurance underwriting.	Provide cyber insurance providers with information needed to evaluate risk levels for insurance underwriting.
	Other strategic services	Services to evaluate risk profile and security posture, can be performed to varying levels of detail, with or without technology deployment.	Understanding of organizations's risk profile and security posture.
AM I COMPROMISED?	Compromise Assessment	Evaluate your environment for the presence of targeted attacker activity using the same methods and technologies we use during incident response.	Know whether or not your organization is currently or was previously compromised.
AM I BREACHED?	Incident Response	Pre-established, proactive terms and conditions for Mandiant services in the event you experience a suspected or confirmed information security incident.	Decrease response time and reduce the impact of a security incident.
PREPARE FOR FUTURE EVENTS	Cyber Defense Center Development	Help organizations transition from a "reactive" compliance-based incident response methodology to a "proactive" and mission-focused program, fully aligned with your business.	Develop and improve your security operations and computer incident response team (CIRT) capabilities.
	Cyber Intelligence Integration Services	A suite of services to help organizations design and build cyber threat intelligence (CTI) solutions and capabilities within security and business operations.	Transform your security operations for intelligence-led adaptive decision making across the organization.
	Education	In a world where threats continuously evolve, nothing is more important than continuing education. Education and training are part of Mandiant's mission.	Stay informed and up to date on the changing tactics, tools and procedures of advanced attackers.
